Building a Disaster Resilience Plan

This document is a companion to the *Community Resilience Strategies* and the *Disaster Resilience Planning Guide*. It serves to identify priorities for your community in the community resilience assessment process.

The characteristics in this document are mirrored in the *Community Resilience Strategies (CRS)* and are gathered into two major categories of resilience: Community Resources and Disaster Management. In both of these categories, characteristics and strategies are further organized to relate to the specific domains of resilience outlined in the *CRI*. For example, one of the domains of resilience in the *CRI* category “Community Resources,” is defined by the statement *Our community is close knit and involved*. If that is an area of resilience you have determined needs some improvement in your community, you would review the strategies listed under *Close Knit and Involved* in the *CRS*.
